Black River Caviar

Who says you have to feel guilty about splurging on caviar? Black River Caviar, harvested from Siberian sturgeon that are fed all-natural, organic feed, is the first wild-raised caviar on the market. It embraces the authentic malosol method (preserved in little salt), so that heavenly flavor is even more nuanced. The Caviar is packaged in custom tins, with sizes ranging from 30 grams (\$102) to 500 grams (\$1,575), www.blackrivercaviar.com
