

BLACK RIVER CAVIAR

## SEABOURN CRUISE LINE

October 30<sup>th</sup>, 2013. Montevideo, Uruguay.

“*Black River Caviar* is very pleased to announce its new partnership with Seabourn Cruise Line. Both companies share the philosophy of providing their clients only with the finest quality products and services in an environmentally responsible way. We are grateful to Seabourn for supporting sustainable farming, which is critical to the preservation of several sturgeon species. We consider it a great honor to be working with a company which is not only known as the pre-eminent luxury cruise line, but it is also the role model for environmental stewardship.”

“Caviar is a luxury,” noted Richard Meadows, Seabourn’s president, “and as such, it is a part of the culinary repertoire on board our ships. Seabourn guests expect us to provide quality caviar,” he continued, “and they also share our concern for sustainability, so we are pleased to have discovered the Black River ossetra.”
