

BLACK RIVER CAVIAR

AN EXCEPTIONAL YEAR FOR URUGUAYAN CAVIAR

June 26th, 2015

The 2015 harvest of our caviar is set to be one of the best in our history.

This year has been exceptional for the production of caviar in Uruguay.

Mainly due to the weather, which was extremely favorable, to this date harvested caviar is of a superior quality, especially regarding flavor and texture, presenting a unique firmness.

On the other hand, it took longer for roes to reach their ideal point of maturity, and therefore, annual production estimates fell.
